

Cystic Fibrosis our focus

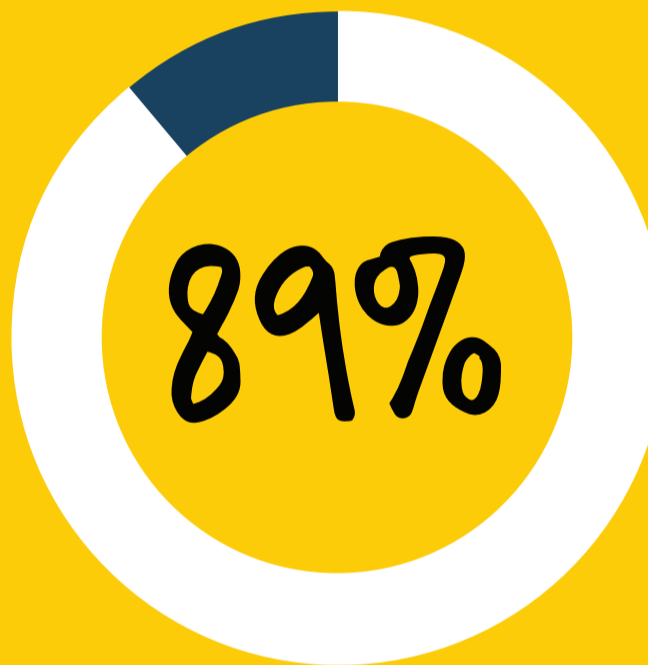

Exploring clinical trial opportunities – 2020 survey results

71%
have spoken to their CF team about clinical trials in general

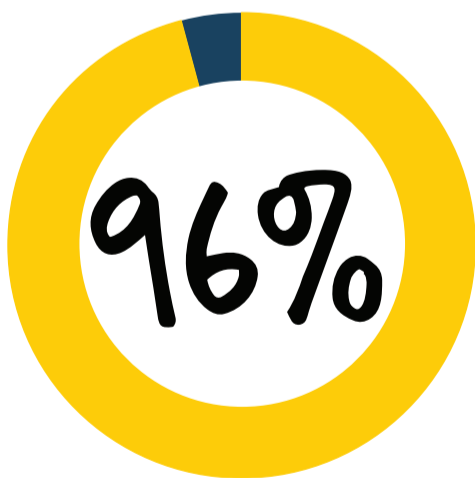

57%
of respondents were from people with CF; the remainder were parents or carers

felt the opportunity to consider taking part in a clinical trial was positive.

On a scale from 1 to 5, **72%** rated the experience as overwhelmingly positive (level 5)

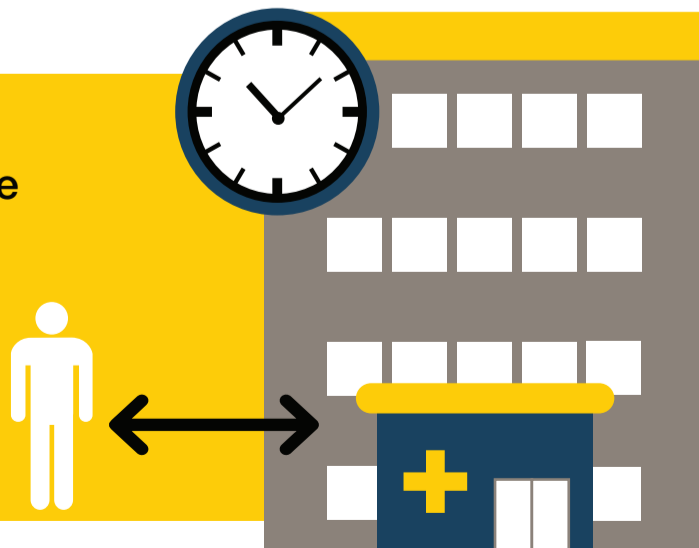

of those who have taken part in a clinical trial would do so again

64%  did not receive feedback after they participated in a trial

Key reasons people declined to participate in a trial included the inconvenience of additional hospital visits, appointments and time burden
