

Quality Improvement Working Group

Our new Quality Improvement working group is made up of people living with CF, their families, CF health care professionals and members of the Trust. The group is co-designing the Trust's QI strategy and will develop key projects to improve CF care and services.

Our last meeting on 16 March 2021 concentrated on developing our three-year Aims and Principles, this is what we have so far...

Aim

We aim to support centres to ensure delivery of meaningful care in collaboration with the patient. We will work to ensure this high-quality care follows the patient throughout their care journey and reaches every patient equitably.

Principles

- Value-based;
- Collaborative, adaptive care;
- Linked to patient and local needs;
- Empowering people living with CF and their families.

QIWG

We want the Trust's QI Strategy to be focused on what matters to the CF community. Tell us what you think about the draft Aims & Principles using Slido or e-mail us at QI@cysticfibrosis.org.uk.
